BITS PILANI, DUBAI CAMPUS INTRODUCES

M.E. Electrical Engineering with specialization in Power Electronics and Drives

The M.E. Electrical Engineering Programme with a specialization in Power Electronics and Drives is designed and structured to cater to the learning aspirations of Electrical and Electronics Engineers and complement their continuing education pursuits.

Taught by highly qualified faculty, the programme allows students to be well versed in the operation, function and interaction between various components and sub-systems used in power electronic converters, electric machines and adjustable-speed drives. They will also be able to build up sound knowledge in the areas of interaction of power devices with power systems as well as the control aspects of power electronic activities.

Duration: 2 Years (4 Semesters) | **Schedule: 4 days a week** (Classes in the Evenings & Fridays)
